BencoDental[™]

Dear Benco Customer,

Welcome to dentistry in the “New Normal.” Our industry has experienced more disruption and change in the past few months than in its entire history, but now it’s time to look forward and prepare for the future.

In the “New Normal,” the #1 priority will be patient and staff safety. That’s why we’ve created this Practice Checklist for you; it’s not to sell you more “stuff” you don’t need, it’s to help prepare you for a new reality that will require essential items you may not have needed previously.

As a member of our exclusive Benco Select program, you are eligible for one of our richest offers ever: \$200 off your next purchase of \$1,000 or more. There are no commitments, no forced product bundling, no additional fees; you choose the products from our entire inventory, and you pick the quantities that are right for you. As always, Benco is here to consult and partner with you, not to tell you what to do for your own practice.

In terms of personal protective equipment (PPE), we continue to ration thoughtfully while working 24/7 to source additional N95 masks. Please speak with your Friendly Benco Representative for the latest updates on availability.

We too have experienced the biggest disruption in our company’s history, but we are emerging stronger than ever and ready to serve our valued customers in the “New Normal” and for many more years to come. Thanks for making Benco part of your dental team.

◆ air purification

Air Purification products utilize a varying array of technologies, filters, materials and price points. In dental offices, air can become contaminated through bio-aerosols, patients, chemicals and dust. The use of this equipment helps mitigate the risk of contamination.

- Purebreeze Air Cleaning System**
Vaniman
- AF400M HEPA Air Purifier**
Quatro Air
- Air Disinfecting Purifier**
Oso

*The information and recommendations contained in this flyer represent Benco Dental’s best thinking as of the date below. However, in a fast-changing environment, we urge practitioners to check with other professional advisors (attorneys, accountants, regulators, etc.) as they restart their practices. Effective May 4, 2020.
