

BIOCLEAR HANDS-ON IN-PERSON CERTIFICATION COURSE

BLACK TRIANGLE CERTIFICATION

To achieve long-lasting and conservative results that look amazing!

BLACK TRIANGLE CERTIFICATION COURSE

This three-part hands-on certification course will teach you how to treat black triangles, gingival recession root abrasions, and to perform restorations confidently. In becoming a certified Bioclear Black Triangle doctor, you'll increase your overall skill and knowledge of Bioclear and learn to market your new skills to patients.

WHAT DOES IT MEAN TO BE CERTIFIED?

Bioclear Certification is an indicator of a level of achievement in a particular area of treatment using the Bioclear Method. Certified providers have completed advanced training in the Bioclear Method, and have received their education directly from Bioclear faculty members. Becoming Black Triangle Certified means you are a highly skilled provider in treating simple black triangles, gumline recession, and multiple black triangles.

STEPS TO BECOMING CERTIFIED:

1. Review pre-course reading materials and videos, then complete the online pre-course educational quiz
2. Complete a one-day hands-on course
3. Submit your own black triangle cases to the Bioclear faculty for approval - following the one day course.
